PANCREATIC CANCER NORTH AMERICA

Signs and symptoms of pancreatic cancer

Pancreatic cancer is difficult to diagnose at an early stage because there are often no definitive symptoms until the cancer has advanced.

One or more of the symptoms below may be present:

- Jaundice (yellowing of the skin and the whites of the eyes and dark urine)
- Pain in the upper abdomen and/or upper back
- Loss of appetite
- Unexplained weight loss
- Weakness
- Diarrhea or constipation
- Nausea and vomiting
- Pale, greasy stools that may float in the toilet
- Indigestion or difficulty digesting certain foods
- Pruritis
- New-onset diabetes
